

SINGLE SIGN-ON

Offer one simple login for all digital services and applications

MANAGING CUSTOMER ACCOUNTS IS COSTLY FOR ANY ORGANISATION.

Provide Single Sign-On capabilities for your external users (customers, partners, contractors) to easily login once with their credentials and authenticate to all the digital services and applications they have been granted rights to – eliminating the need for multiple logins or credentials.

RECOGNISE AND GAIN INSIGHTS FROM EXTERNAL USERS AS THEY NAVIGATE THROUGH YOUR APPLICATIONS, STARTING WITH THE IDENTITY PROVIDER AND MFA SUPPORT YOUR BUSINESS NEEDS DEMAND.

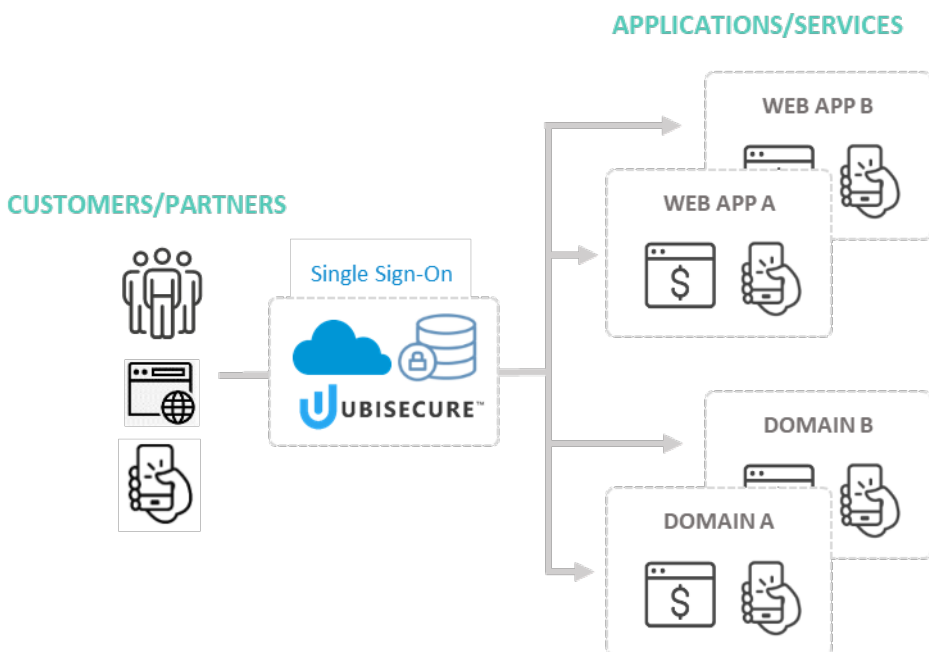

KEEP CUSTOMERS LOGGED IN AS THEY NAVIGATE SEAMLESSLY THROUGH YOUR MULTIPLE DIGITAL SERVICES AND APPLICATIONS

Improve the customer experience and journey, reduce support costs

Decrease abandonment, increase retention and encourage repeat logins

Maintain a straightforward application architecture with a centralised Single Sign-On and authentication solution

Support for dozens of identity providers and MFA form factors, as well as enterprise user identity data stores

CENTRALISED POLICY

Benefit from a centralised policy management that delivers the right identity attributes to internal or external applications ensuring compliance to privacy regulations. Centrally control who has access to which resources or applications in your ecosystem – down to domain, specific resources, applications and digital services.

IMPROVE SECURITY, ELIMINATE SUPPORT COSTS

With reduced login credentials to remember, users will have less impact on support helpdesks. With reduced password fatigue, users will expose passwords less frequently.

Offer one simple login for all digital services and applications

About UbiSecure Inc

Founded in 2002, UbiSecure is a pioneering b2b and b2c Identity Services software and cloud services provider dedicated to enabling the true potential of digital business. UbiSecure's Identity Platform comprises of Customer Identity & Access Management (CIAM) and Identity-as-a-Service (IDaaS) solutions that allow businesses to put the customer's identity at the beginning of their journey to create a seamless, secure experience across digital services and devices. Uniquely, the Identity Platform also connects digital services and Identity Providers such as social networks, mobile networks, banks and Governments, to allow Service Providers to benefit from the rich, verified identities to streamline login, registration and customer engagement while improving privacy and consent around personal data sharing. UbiSecure is headquartered in Finland, with offices in the UK and Sweden, and works through a network of local and global system integrator partners.
